

Sanjoy Kumar Sarkar

IT & Digital Systems Professional

Bangladesh | imsanjoy562@gmail.com
[linkedin.com/in/sksarkar](https://www.linkedin.com/in/sksarkar) | github.com/sanjaysarkar007

PROFESSIONAL PROFILE

IT and digital systems professional with around eight years of experience across international development, humanitarian operations and public health. Combines enterprise infrastructure, Microsoft 365 and user support with hands-on PostgreSQL, Linux, MIS and digital health systems. Experienced in translating operational requirements into practical technology and supporting the people who use it.

PROFESSIONAL EXPERIENCE

IEDCR

IT Officer - Data & MIS | Mar 2025 - Jun 2026

- Contributed to EWARS development and operation, connecting climate and epidemiological information with dashboard and reporting workflows.
- Worked with PostgreSQL, Python services and automated data integrations; supported Linux application environments using Docker, Nginx and systemd.

Winrock International

IT & Admin Officer | Sep 2023 - Mar 2025

- Managed day-to-day IT services, Microsoft 365 support, office connectivity, accounts and devices.
- Coordinated implementation and support of web-based MIS, dashboards and reporting automation, translating programme needs into practical systems.

Oxfam Bangladesh

Information Technology Officer | Oct 2021 - Aug 2023

- Served as a primary IT resource for field operations, supporting networks, connectivity, endpoints and user systems.
- Resolved hardware, software and account incidents and supported collaboration platforms in a demanding field environment.

Save the Children Bangladesh

Assistant Officer - ICT Infrastructure Administration | Oct 2018 - Oct 2021

- Supported LAN/WAN connectivity, Microsoft-based environments, enterprise applications and end-user devices.
- Troubleshoot hardware, software and access issues; supported endpoint deployment and infrastructure maintenance.

Sanjoy Kumar Sarkar

Technical capabilities & continued development

CORE CAPABILITIES

Strong / hands-on: IT operations, enterprise support, infrastructure, networking, Microsoft 365, PostgreSQL, SQL, Linux, MIS and technical troubleshooting.

Working experience: Python, FastAPI, Docker, Nginx, systemd, APIs, data pipelines, Power BI and the Azure / Entra ecosystem. DHIS2 integration concepts.

Professional delivery: Requirements gathering, vendor coordination, IT procurement, technical documentation, training, incident triage and cross-functional collaboration.

Developing: Cloud engineering, advanced PostgreSQL tuning, DevOps practices, machine learning and AI / data engineering.

SELECTED PROFESSIONAL WORK

Climate-Informed Early Warning & Response System

Connecting disease surveillance, climate information and operational technology to support public-health preparedness.

Automated Disease & Climate Data Pipelines

Supporting automated collection, integration and database workflows for surveillance and forecasting.

Web-Based MIS & Operational Reporting

Translating programme requirements into practical information systems, reporting and staff adoption.

Enterprise IT Operations & Infrastructure

Supporting people, networks and enterprise services across headquarters and humanitarian field operations.

EDUCATION

Professional Master's in Artificial Intelligence & Data Engineering

University of Dhaka | Ongoing

B.Sc. in Computer Science and Engineering

Jawaharlal Nehru Technological University, India | 2014 - 2018

RESEARCH & CONFERENCE CONTRIBUTIONS

2026 | Operationalizing Climate-Informed Disease Forecasting: A Probabilistic Deep Learning Early Warning System at National Scale.

Conference abstract contribution · Abstract ID A2026032. Final presentation status to be confirmed.

2025 | Signals to Safety: EWARS for Health Emergencies - Present Realities and Future Directions.

Accepted for poster presentation. Conference was not held.
