

SANJOY KUMAR SARKAR

IT, DATA & DIGITAL SYSTEMS PROFESSIONAL

IT Operations | MIS & Data Systems | Digital Health | Infrastructure & Service Delivery

Nikunja 2, Dhaka | +880 1724 353766 | imsanjoy562@gmail.com | [linkedin.com/in/sksarkar](https://www.linkedin.com/in/sksarkar)

CAREER PROFILE

IT and digital systems professional with 7+ years of progressive experience across government, humanitarian and international development organizations. Combines hands-on IT infrastructure and enterprise support experience with MIS, database, dashboard, automation and public-health information systems work. Experienced in Microsoft 365/Azure environments, Active Directory and network administration, web-based MIS, SQL/PostgreSQL, Power BI/Excel, DHIS2, Kobo/ODK, digital surveillance and EWARS workflows. Has supported distributed teams, partner organizations and government stakeholders, coordinated vendors and IT assets, trained users, and translated operational requirements into practical digital solutions. Currently pursuing a Professional Master's in Artificial Intelligence & Data Engineering at the University of Dhaka.

AREAS OF EXPERTISE

IT Operations & Infrastructure	MIS, Data & Reporting	Digital Health & Surveillance
Microsoft 365 / Azure / AD	Power BI / Advanced Excel	EWARS / DHIS2 Workflows
LAN/WAN / Server Support	SQL / PostgreSQL / Databases	Health & Climate Data Integration
IT Service Desk / Jira	Dashboard & Reporting Automation	Public Health Dashboards
IT Security / Access Control	ETL / Data Cleaning / Validation	Stakeholder Data Coordination
Vendor / Asset Management	KoboToolbox / ODK	Training & Capacity Building

PROFESSIONAL EXPERIENCE

IT Officer (Data & MIS) | IEDCR - Institute of Epidemiology, Disease Control & Research

March 2025 - June 2026 | Dhaka, Bangladesh

Worked at the intersection of IT operations, public-health information systems and data engineering for a climate-and-health programme, supporting the implementation and operation of an Early Warning, Alert and Response System (EWARS).

- Supported integrated disease-surveillance workflows combining epidemiological, meteorological and geospatial data; coordinated data exchange among IEDCR, government agencies, sentinel sites and partners.
- Developed and maintained reporting pipelines, dashboards and automated data workflows using SQL/PostgreSQL, Python-based services, DHIS2-enabled processes and visualization tools.
- Provided infrastructure, system troubleshooting, web-system and user support; managed IEDCR website updates and supported continuity of digital services.
- Prepared analytical outputs and technical documentation and trained healthcare professionals and data users on reporting systems, data interpretation and digital tools.

IT & Admin Officer | Winrock International

September 2023 - March 2025 | Dhaka, Bangladesh

Managed day-to-day organizational technology while also improving MIS, reporting and administrative workflows for a donor-funded development programme.

- Managed IT systems, networks, Microsoft 365 collaboration tools, databases and user support; coordinated vendors, procurement, licenses and IT asset inventory.
- Designed and administered web-based MIS and reporting workflows, using database tools, Microsoft Access, Excel and Power BI to improve information availability and reduce manual reporting work.
- Provided IT consultation, training and structured technical support to staff and partner teams, including virtual meeting and collaboration platforms.
- Supported IT policy compliance, documentation, operational reporting and technology planning; supervised support staff and coordinated an MIS consultant.

Information Technology Officer | Oxfam International

October 2021 - August 2023 | Cox's Bazar, Bangladesh

Served as the primary field IT focal point supporting humanitarian operations in Cox's Bazar and Teknaf, balancing infrastructure reliability, user support, security and field-office technology needs.

- Managed local IT infrastructure, user accounts, Active Directory-related support, connectivity, devices and operational technology services across multiple teams and locations.
- Led troubleshooting and user support, staff training, IT procurement and vendor coordination while maintaining organizational standards and security requirements.
- Prepared annual IT budgets, infrastructure plans and disaster-recovery documentation and supported digital-transformation initiatives and reporting systems.

Assistant Officer - ICT Infrastructure Administration | Save the Children Bangladesh

October 2018 - October 2021 | Dhaka, Bangladesh

Built a strong enterprise IT foundation supporting a large multi-office environment, including headquarters, field locations and partner organizations.

- Administered and supported Domain Controllers, Active Directory, WSUS, gateway servers, LAN/WAN, user accounts, email and access-control environments.
- Provided hardware, software, network and application support with service-level tracking for a broad user base across Dhaka and field offices.
- Supported IT infrastructure monitoring, partner-NGO technology guidance, vendor SLA compliance, system maintenance and technology-enabled programme operations.

EDUCATION

Degree / Programme	Institution	Period	Status / Location
Professional Master’s in Artificial Intelligence & Data Engineering	University of Dhaka	2026 - 2027	Expected Aug 2027 Dhaka
Bachelor’s Degree in Computer Science & Engineering	Jawaharlal Nehru Technological University	2014 - 2018	India

TECHNICAL SKILLS

Infrastructure & Enterprise IT	Microsoft 365 Administration; Microsoft Azure; Active Directory; Windows Administration; WSUS; LAN/WAN; access management; end-user support; IT asset management; vendor management
Data, MIS & Analytics	SQL; PostgreSQL; Power BI; Advanced Excel; Microsoft Access; web-based MIS; dashboard development; data cleaning and validation; reporting automation; ETL/data workflows
Digital Health & Field Data	DHIS2; EWARS; KoboToolbox; ODK; surveillance reporting; climate-health data integration; epidemiological reporting
Tools & Collaboration	Jira Service Desk; Microsoft Teams; SharePoint; Zoom; Python; FastAPI; Docker; Linux; Git

SELECTED PROFESSIONAL STRENGTHS

- Cross-sector experience: Government public health, international NGOs, humanitarian response and donor-funded development programmes.
- Can operate across both technical infrastructure and data/MIS functions, making the profile suitable for IT Officer/Manager, MIS/Data, Digital Transformation and Digital Health opportunities.
- Experienced in supporting distributed offices and large user environments, coordinating stakeholders and translating operational needs into practical systems.
- Strong user-facing capability: technical support, training, documentation, capacity building and communication with non-technical teams.
